

KRISTOPHER J. CASEY

Associate Director, Frontend Engineering

New Jersey, USA | 732-744-6295 | kristopher.casey@icloud.com | linkedin.com/in/kristopherjoncasey

PROFESSIONAL SUMMARY

Engineering leader with 12+ years at Verizon and 15+ years overall in frontend development, digital platforms, and cross-functional product delivery. Proven track record building and scaling distributed engineering teams, driving platform modernization, and delivering measurable business outcomes across web, email, and content management systems. Deep expertise in Adobe Experience Manager (AEM), component-based architecture, CI/CD pipelines, and AI-assisted tooling. Adept at translating complex technical requirements into clear roadmaps, aligning engineering execution with business strategy, and leading onshore and offshore teams through ambiguous, fast-moving environments.

CORE COMPETENCIES

- | | | |
|--|---|---|
| ▪ Adobe Experience Manager (AEM) | ▪ Frontend Architecture & Component Systems | ▪ Engineering Team Leadership (US & Offshore) |
| ▪ CI/CD Pipeline Management | ▪ Agile / Scrum / SAFe | ▪ Digital Marketing Platforms |
| ▪ Email Platform Development (Adobe Experience Platform: Journey Optimizer / Campaign Classic) | ▪ Accessibility Compliance (WCAG / ARIA) | ▪ API Integration & System Architecture |
| ▪ Stakeholder & Executive Communication | ▪ AI-Assisted Development & Tooling | ▪ Cross-Channel Personalization |
| ▪ Performance & Analytics Optimization | ▪ Technical Roadmap & Strategy | ▪ Process Improvement & Automation |

PROFESSIONAL EXPERIENCE

Associate Director, Frontend Engineering

May 2025 – Present

Verizon Consumer Group — Digital

Basking Ridge, NJ (Hybrid)

- Lead an 11-person distributed engineering team (4 US, 1 Costa Rica, 6 India) responsible for frontend component development, email platform engineering, and digital content delivery across Verizon's consumer-facing web and marketing platforms.
- Own end-to-end frontend delivery across Adobe Experience Manager (AEM), marketing and transactional email systems (Adobe Journey Optimizer, Adobe Campaign Classic), and a shared component library serving multiple product lines and cross-functional teams.
- Architected and led the migration of a 50+ component legacy framework to a modern, design-system-aligned component library — improving developer velocity, reducing duplication, and establishing a single source of truth for frontend components across the organization.
- Drove adoption of AI-assisted development tooling, including an internal accessibility checker and agentic coding workflows using Claude — reducing manual QA effort and accelerating defect resolution cycles.
- Launched and co-led a major homepage personalization initiative, splitting the consumer homepage into distinct prospect and authenticated-customer experiences with phased rollouts

- coordinating tagging, analytics, CDN routing, and content authoring across six teams simultaneously.
- Established and enforced CI/CD pipeline governance across Alpha, Beta, Canary, Staging, and Production environments, resolving recurring deployment failures, formalizing SLA agreements with SRE and platform engineering teams, and eliminating a critical single point of failure affecting all frontend releases.
- Defined and executed the team's security and access control strategy for AEM platform instances — transitioning 170+ users from individual folder permissions to a standardized role-based group model, addressing compliance gaps and reducing unauthorized change risk.
- Partnered with Verizon's UX, product, analytics, and content delivery leadership to align frontend execution with enterprise digital strategy across major device launches (Apple, Google, Samsung) and plan product changes.
- Recruited, mentored, and retained top engineering talent — maintaining team stability and performance through periods of organizational change and resource constraints.

Senior Manager, Frontend Development

Dec 2023 – May 2025

Verizon Consumer Group — Digital

Basking Ridge, NJ (Hybrid)

- Defined and owned the strategic roadmap for frontend development across Verizon's consumer web and email platforms, aligning engineering capacity with product and marketing priorities across quarterly release cycles.
- Led cross-functional delivery of major consumer product launches — including flagship device releases and Verizon plan restructuring — coordinating frontend, content, personalization, and QA workstreams across onshore and offshore teams.
- Built and scaled a high-performing engineering team through a period of significant platform modernization, managing onboarding, performance, and career development for engineers across multiple time zones.
- Led the design and implementation of a cross-channel content sharing architecture in AEM — enabling a single piece of content to be authored once and deployed across web, email, and CMS channels, reducing redundant authoring effort by an estimated 40% and accelerating time to market.
- Served as AEM and frontend subject matter expert for the organization — establishing coding standards, authoring guidelines, and component governance practices adopted across the full development org.
- Partnered with digital marketing, design, and analytics leadership to integrate personalization capabilities into the consumer homepage and product pages — driving measurable lift in engagement and conversion for targeted customer segments.
- Identified and executed systemic workflow improvements across code release management, QA automation, and deployment notification systems — reducing manual overhead and improving release predictability.
- Contributed to technical architecture and API integration decisions for major platform initiatives, including third-party system onboarding and internal tooling development.

Manager, Frontend Development

Apr 2020 – Dec 2023

Verizon Consumer Group — Digital

Basking Ridge, NJ (Hybrid)

- Managed frontend development execution across AEM-based web and email platforms, overseeing project timelines, resource allocation, and delivery quality for a distributed team of engineers.
- Coordinated onshore and offshore development across multiple simultaneous product workstreams, maintaining delivery velocity through the COVID-19 transition to fully remote operations.
- Supported major consumer product launches across Apple, Google, Samsung, and Verizon's own plan portfolio — acting as the technical bridge between marketing, design, and engineering teams to ensure launch readiness.
- Led the implementation of Verizon's email platform component refresh, establishing reusable template libraries across marketing and transactional channels — reducing per-campaign development time and improving rendering consistency across clients.
- Introduced structured code review, QA validation, and release management processes that improved defect detection rates and reduced post-deployment rollbacks.
- Acted as AEM technical advisor for internal stakeholders — providing guidance on component architecture, content authoring workflows, and integration patterns to cross-functional partners in marketing, SEO, and e-commerce.
- Contributed to system integration planning for new digital marketing tools, supporting API design, requirements documentation, and vendor evaluation.

Senior Frontend Developer

Oct 2016 – Apr 2020

Verizon Consumer Group — Digital

Basking Ridge, NJ

- Designed, built, and maintained frontend solutions across Verizon's AEM-based digital properties — delivering high-quality components, templates, and integrations for web and email channels.
- Led development of reusable AEM component sets used across multiple product lines, reducing per-project build time and standardizing the authoring experience for content teams.
- Drove migration of Verizon.com to a component-based architecture in AEM, contributing to a 500,000+ URL restructuring effort that improved SEO performance, site maintainability, and page load consistency.
- Collaborated with digital marketing and e-commerce teams to instrument analytics tagging, A/B testing, and personalization capabilities across consumer product pages.
- Supported major device and plan launches as the technical lead responsible for frontend build, QA, and deployment — consistently meeting time-sensitive release windows across multiple annual cycles.
- Mentored junior developers and contributed to team knowledge-sharing through code reviews, documentation, and internal training on AEM best practices and frontend development standards.
- Managed coordination with offshore development partners to extend delivery capacity — establishing documentation and handoff standards that improved offshore output quality and reduced rework.

Frontend Developer

Sep 2014 – Oct 2016

Verizon — Contract

Basking Ridge, NJ

- Developed and maintained frontend components and templates in Adobe Experience Manager (AEM) for Verizon's consumer digital properties.
- Supported cross-functional digital marketing campaigns and product page launches, contributing front-end code for web and email channels under tight release windows.
- Rapidly acquired AEM platform expertise and front-end development best practices — transitioning from contractor to full-time employee within two years based on performance.
- Collaborated with design, content, and IT teams to implement digital marketing initiatives aligned with business objectives.

Web Developer & Digital Marketing Manager

2011 – 2014

Berlitz Languages, Inc.

Princeton, NJ

- Owned web development, digital marketing, and online campaign strategy for Berlitz U.S., Berlitz Canada, TMC, and SLTI — managing eight web properties and all associated digital channels.
- Achieved **450% ROAS** in Q2 2014, a 75% year-over-year improvement, through optimized SEM, SEO, social media, and email marketing strategies.
- Improved lead generation by **46%** and reduced cost per lead by **33%** through conversion rate optimization and landing page redesign.
- Increased unique page views by **120%+** through SEO content strategy, site architecture improvements, and performance optimization.
- Designed and launched multilingual e-commerce solutions with CRM and third-party system integrations — supporting both consumer and corporate language training programs across North America.
- Managed agency and vendor relationships for paid media and social — driving consistent optimization across channels and audiences.

EDUCATION

Bachelor of Science, Computer Science

2008 – 2021

DeVry University

GPA: 3.86 · **Valedictorian** · Golden Key International Honour Society

Completed part-time while working full-time

Associate of Applied Science, Electronic & Computer Technology

2006 – 2008

DeVry University

GPA: 3.67 · Phi Theta Kappa Honor Society

SELECTED IMPACT METRICS

Area	Outcome	Context
Lead Generation	+46% leads, –33% cost per lead	Berlitz e-commerce redesign & CRO
Paid Media ROAS	450% ROAS (+75% YoY)	Berlitz Q2 2014 SEM / digital campaigns
SEO & Traffic	+120% unique page views	Berlitz multi-site SEO & architecture
URL Migration	500,000+ URLs restructured	Verizon.com AEM platform migration
Content Authoring Efficiency	~40% reduction in redundant authoring	Cross-channel content sharing architecture (AEM)
Access Control & Security	170+ users transitioned to role-based model	AEM platform permission governance initiative

Component Library	50+ components migrated to modern design system	Legacy framework deprecation & internal design system migration
Team Scale	11 engineers across 3 countries	Current distributed team (US, Costa Rica, India)
